

INTEGRATION OF LLM-APIs

Using LLM APIs in the context of
corporate digitization:
A strategic guide for managers

Are you also facing the challenge of using innovative technologies effectively to optimize your business processes?

Find out how LLMs enable intelligent and intuitive interactions between users and digital platforms.

Duration: 2 hours

Number: by arrangement

Location: by arrangement

Get-Together

CONTENTS

What are LLMs?

- **Introduction to Large Language Models**
-

Use cases

- **Simplification of complex problems**
- **Linguistic interaction with software**
 - Hands-free operation
 - Chat instead of complex forms

- **Retrieval Augmented Generation (RAG)**
-

How do I integrate LLMs?

- **OpenAI API / Azure OpenAI API / LM Studio**
 - **Abstractions independent of the model provider**
 - LangChain
 - Microsoft Semantic Kernel
-

Get-Together with personal exchange

In the course of digital transformation, companies are faced with the challenge of using innovative technologies effectively to optimize their business processes and increase customer satisfaction.

Large Language Models (LLMs), as developed by leading technology providers, offer a pioneering solution for intelligent and intuitive interaction between users and digital platforms. These advanced models make it possible to simplify complex issues, offer seamless voice-driven operation and enable interaction with software solutions via natural language dialogs, reducing the need for complex user interfaces.

In addition, through techniques such as Retrieval Augmented Generation (RAG), LLMs offer the possibility of using existing information to generate new content or supplement data, which means a significant increase in efficiency in information processing and provision.

Various platforms and tools are available for companies wishing to integrate this technology, including the OpenAI API, Azure OpenAI API, LM Studio and frameworks such as LangChain and Microsoft Semantic Kernel, which enable flexible and vendor-neutral integration into existing IT infrastructures.

Prepare for the future.

Examine the integration
of LLM APIs in your
corporate strategy
and shape the digital
transformation of your
company with the
latest technologies.
